Villa just outside Casarabonela

This typically Spanish village is set in an Environmentally Protected Area and retains the charm of the Spanish way of life combined with modern amenities.

This impressive 312 square meter, six-bedroom villa is set in approximately 20,000 square meters of its own land and is truly stunning. There has been a house on this site for as long as anyone can remember but the majority of this villa is of much more recent construction. As you approach the property via its own private drive you are greeted by landscaped gardens covered with trees.

As you enter you walk into an impressive entrance hall off of which all other rooms lead. It grants access to a large dining room next to which is the kitchen. The kitchen is not only large but has great views out across the countryside. There is also a utility room at the end of the kitchen, which also provides access out on to one of the many large terraces. There is a large lounge with feature fireplace as well as a very good-sized office / study. Lastly on the ground floor there is also a huge family bathroom, complete with bath, W/C, sink and bidet.

On the first floor there are two bathrooms and six bedrooms, three doubles, three singles. Two of the doubles are very big and could both be described as master bedrooms. One however also has access out on to its own private terrace. The two bathrooms are fully fitted.

The immaculate finish that this property offers continues as you move outside. The villa has numerous terraces, which wrap round most of the front of the property. There is a large swimming pool at the rear of the property (9 meters by 5 meters) that offers great 360-degree views. There are also garages and a utility room located separately from the main house. There is 150,000-litre water deposit and a 2,000-litre water deposit, all fed by a private mountain stream, which not only provides water for the house but is also used to irrigate the land.

Summary – A stunning six-bedroom villa in an idyllic location. We expect interest to be high so an early viewing is most definitely recommended.
